Where can I recycle a lead acid battery?

Clarity is an approved exporter of lead acid batteries. We collect for recycling across the UK, offering you a safe, legal and convenient solution to scrap lead battery disposal. We work with a major international manufacturer to ensure the materials from your scrap lead acid batteries are sustainably recycled.

Are lead acid batteries recyclable?

Therefore, consumers should be informed about the fact that lead acid batteries are recyclable, what the procedures are for returning the used battery to the retailer, how the used batteries are stored while waiting to be dispatched to the collection center, and where the collection centers are located;

Where do you buy lead acid batteries?

We purchase wasted lead acid batteries from scrap metal merchants, End of Life Vehicle (ELV) operators, battery retailers and waste contractors across the UK. All batteries pass through Clarity's own network of hubs.

What is lead-acid battery recycling?

As already mentioned, lead-acid battery recycling has a long tradition, especially in industrialised countries. The battery and scrap trade takes back spent batteries free of charge or even pays the metal value.

Are used lead-acid batteries hazardous waste?

Used lead-acid batteries must be considered as hazardous wastes when transport is needed. Again, the main problem associated with battery transport is the electrolyte, which may leak from used batteries, requiring control measures in order to minimize the risk of spillage and define the specific actions to be taken in event of an accident:
