

# Apply for solar energy grid connection

Can solar panels be connected to the National Grid?

Connecting solar panels to the National Grid means you can potentially earn money back through a feed-in tariff. Click here to find out more.

Why should a solar PV system be connected to the grid?

For financial benefit. Connecting your solar PV system to the grid allows you to take advantage of the FIT, which gives you a fixed amount of money for each kWh of electricity you generate. On top of these payments for energy generation, you also receive a sum of money for feeding any surplus energy into the grid.

How to connect a solar power system?

Whenever you want to connect a solar power system, you must complete a DNO application with the relevant distribution network operator. This allows them to accurately calculate the necessary electricity. The documentation required depends on the size of the solar generator.

How much money can you make if you connect to the grid?

On top of these payments for energy generation, you also receive a sum of money for feeding any surplus energy into the grid. By combining these two payments with potential savings on energy bills, you stand to make up to £695 a year by connecting.

How do I decommission my solar generation?

To decommission your solar generation or scheme, get in touch using a decommissioning form. National Grid (not related to solar generation): To decommission your solar generation, get in touch using a decommissioning form.

Do I need permission to supply energy to the grid?

For larger systems (anything above a 3.68kW output), the DNO needs to give permission before you can start supplying energy to the grid. They will investigate whether the grid in your area can handle the extra energy that your system generates, and will identify any improvements that might need to be made in order for it to do so.
