

Battery Marketing Strategy Analysis

Do battery demand forecasts underestimate the market size?

Just as analysts tend to underestimate the amount of energy generated from renewable sources, battery demand forecasts typically underestimate the market size and are regularly corrected upwards.

Will Australian battery market grow over the first half of the century?

The new research considers the projected growth of the Australian battery market over the first half of the century outlining the entire lifecycle, from sales through to end of life. It confirms the rapid growth of the Australian battery market across all battery formats, particularly the dominance of lithium-ion batteries.

What is the market share of lead acid batteries in 2021?

Currently, Lead Acid batteries hold the market share for EoL arisings at just over 160,000 tonnes in 2021. As product markets such as BESS and EV start to increase their share of battery demand over the next decade, Lithium-ion EoL arisings will increase as these batteries reach EoL in 15 years to 20 years. Figure 8.

How does the choice of battery affect supply chain?

The choice of battery will also have supply chain implications depending on where it is manufactured. Leading OEMs are aligning their battery strategy with their product roadmap and their overarching corporate strategy. This comprehensive approach includes supply chain setup, vertical integration, and resource allocation.

What is the market share of lithium ion batteries in 2021?

Currently, Lead Acid batteries hold the market share for EoL arisings at just over 160,000 tonnes in 2021. However, as product markets such as BESS and EV start to increase their share of battery demand over the next decade, Lithium-ion EoL arisings will increase as these batteries reach EoL in 15 to 20 years.

Which chemistry dominates the battery market - lithium ion or alkaline?

Lithium-ion batteries make up the major share of battery sales for this category at 43%, highlighting the increasing market dominance of this chemistry for rechargeable applications. Alkaline batteries follow at just over 38% of sales, reflecting the dominance of the alkaline chemistry in single use applications requiring Stand-alone batteries.

jobs connected to each other, so if BYD Group can be real strong market positioning and product strategy, firmly grasp the new energy market development opportunity, ...

This strategic assessment report, from Stratview Research, provides a comprehensive analysis that reflects today's battery market realities and future market possibilities for the forecast ...

By emphasizing sustainability, leading battery players will differentiate themselves from the competition and
