

Battery Repair Project

Who is UK battery repairs?

Welcome to UK Battery Repairs, where expertise meets excellence in lithium battery repair solutions. As specialists in the field, we offer top-notch services encompassing repair, storage, and logistics.

Why should you choose UK battery repairs?

At UK Battery Repairs, we offer lithium battery repair services to maximise environmental and economic benefits. Our team specialises in extending the lifespan of your electric bike's lithium battery through expert repair techniques. By opting for repair instead of replacement, you reduce emissions and save money. Experience sustainability with us.

What happens to damaged batteries?

We dispose of damaged or non-reconditionable batteries responsibly at our breakdown facilities in the United States. For this process, we wrap and package them according to DOT and environmental standards.

How do I fix a faulty battery?

To resolve the faulty cell, we would need to replace it. This involved a shutdown of the HV (high voltage) system, followed by the extraction of the HV battery. We then carefully disengaged the battery cover and disassembled the battery cells, allowing us to access and remove cell 29.

What projects are based on battery?

The following projects are based on battery. This list shows the latest innovative projects which can be built by students to develop hands-on experience in areas related to/ using battery. 1. Human Detection Robot using IR sensors This project involves building a robot that uses PIR (passive infra-red) sensors to detect the human presence.
