

Battery production line acquisition

Why did lionvolt acquire a battery production site in Scotland?

The acquisition of the battery production site in Scotland brings new complementary capabilities to the company, and sets LionVolt up for the next phase of growth. The site will be repurposed to manufacture battery cells that embed LionVolt's innovative 3D technology.

What happened to lionvolt batteries?

In consequence, administrators were appointed on January 19th, who on January 25th sold the battery cell manufacturing facility in Thurso to LionVolt. The site is now being converted to battery cell production by LionVolt. The company intends to produce solid state batteries with its 3D electrode architecture on the existing production line.

Who makes Amte batteries?

Dutch company LionVolthas taken over battery cell production of Scottish battery manufacturer AMTE Power in Thurso.

Is lionvolt a good battery company?

Dutch startup LionVolt has acquired AMTE Power's battery cell production line in Scotland. It says it will use the assets for pilot production of its 3D solid-state thin-film batteries. LionVolt says its tech provides better performance than the most advanced lithium-ion batteries.

What is battery manufacturing process?

Figure 1 introduces the current state-of-the-art battery manufacturing process, which includes three major parts: electrode preparation, cell assembly, and battery electrochemistry activation. First, the active material (AM), conductive additive, and binder are mixed to form a uniform slurry with the solvent.

How will lionvolt's acquisition save 20 jobs?

The site is now being converted to battery cell production by LionVolt. The company intends to produce solid state batteries with its 3D electrode architecture on the existing production line. LionVolt hopes that this will allow the technology to reach the market faster. The acquisition is expected to save 20 jobs at the site.

This provides excellent opportunities for the adoption of digitalization to address the challenges of gigascale battery cell production, not only because it can effectively manage ...

Last month, ATW (Assembly & Test Europe GmbH), a company based in the German town of Neuwied that makes modern battery assembly lines, was rocked by news that it was facing closure due to the ...

Stockholm-based zinc-ion battery company Enerpoly has acquired former competitor Nilar's end-to-end battery production line and process development capabilities, further enhancing its ...

Battery production line acquisition

Manz, a globally active high-tech equipment manufacturer with a comprehensive technology portfolio, has convinced BMW, one of Germany's automotive manufacturers, with its machines ...

Stockholm-based zinc-ion battery company Enerpoly has acquired former competitor Nilar's end-to-end battery production line and process development capabilities, ...

Last month, ATW (Assembly & Test Europe GmbH), a company based in the German town of Neuwied that makes modern battery assembly lines, was rocked by news that ...

Research on Digital Manufacturing of Lithium Battery Pilot Production Line Based on Virtual Reality. August 2021; ... manufacturing execution construction, information ...

Tesla acquired Maxwell Technologies Inc. in 2019 and made the dry electrode manufacturing technology part of its future battery production plan (Tesla Inc, 2019). This ...

Acquisition of real-time data and control of processes thanks to IIoT technology from KUKA; ... The automated battery carrier production line includes friction stir welding, component ...

We have shown the full implementation depth, starting from process formalization, expert knowledge collection, process instantiation, and data acquisition up to AI ...

Dutch startup LionVolt has acquired AMTE Power's battery cell production line in Scotland. It says it will use the assets for pilot production of its 3D solid-state thin-film batteries.

Focused on the new energy production line, LEAD provides full scenario and full process digital intelligent logistics solutions for intelligent manufacturing. ... It has over 120 cell production ...

In July 2024, Enerpoly announced the acquisition of state-of-the-art dry electrode manufacturing equipment for its megafactory. The end-to-end battery production line and process ...

Manz AG, a globally active high-tech equipment manufacturer with a comprehensive technology portfolio, has convinced BMW Group, one of Germany's leading ...

But a 2022 analysis by the McKinsey Battery Insights team projects that the entire lithium-ion (Li-ion) battery chain, from mining through recycling, could grow by over 30 ...

The acquisition of the battery production site in Scotland brings new complementary capabilities to the company, and sets LionVolt up for the next phase of growth. ...

within battery cell production, quality requirements must be first implemented within the quality planning,

Battery production line acquisition

validated/measured/ analyzed within the quality control steps, and ...
