

Battery replacement time

How long does a battery replacement take?

Physically it takes less than half an hour. But how long it will take for a particular customer depends on way too many factors including whether or not the correct replacement battery is in stock, how many technicians are available, and how many other jobs are in the queue to be performed. I personally waited about 90 minutes.

When should I replace my car battery?

For example, if you find yourself having to jump start the battery multiple times or it loses its charge too quickly after recharging, it is probably time for a replacement. Dim lights and problems with the electronics in your vehicle are symptoms of a flat battery, as well as an engine that takes a long time to crank.

How long do car batteries last?

Car batteries usually last around 5 years, depending on how you use your car. The car's not being driven often enough to charge the battery. There's a vehicle fault draining the battery or affecting charging. The battery's getting tired and may need replacing.
