Where is BYD blade battery made?

Located in the city's Bishan District, the factory is currently the only production base for the Blade Battery. It possesses a highly demanding production environment and much of BYD's self-developed Blade Battery production equipment. The factory has a total investment of 10 billion yuan with an annual production capacity of 20GWH.

What is a 'blade' battery?

The Chinese mobility giant's novel 'Blade' battery eliminates the cell module level to compete with NCM chemistry at a lower cost with greater safety. BYD integrates the Blade battery's BDU and BMS into the pack. (BYD) If I buy an electric vehicle, will its battery catch fire? Statistically such considerations are almost irrelevant.

What is a BYD blade battery?

The blade battery was officially launched by BYD in 2020. BYD claims that compared with ternary lithium batteries and traditional lithium iron phosphate batteries, the blade battery holds advantages in safety, range, longevity, strength and power.

Where are BYD & FAW batteries made?

BYD and FAW have started series production at their new battery factory in Changchun. This will initially have an annual capacity of 15 GWh and is to be expanded to 45 GWh. Blade battery packs will initially be produced there for the Hongqi brand.

Does FAW use BYD blade batteries?

FAW has already been using BYD blade batteries in the Hongqi E-QM5 for some time, for example. The blade battery is an in-house development from BYD. The name refers to the unusual format: the pouch cells are very long and therefore resemble a sword blade.

What is a blade battery EV?

Diverse applications of Blade Battery Electric Vehicles (EVs): Blade Battery technology can be employed in electric vehicles, offering enhanced safety, increased energy density, and longer lifespan compared to traditional lithium-ion batteries. It enables the production of safer and more efficient electric cars with longer driving ranges .

BYD and FAW have started series production at their new battery factory in Changchun. This will initially have an annual capacity of 15 GWh and is to be expanded to 45 ...

BYD is investing in its production for the blade battery technology in Chongqing, China. After the ramp-up, a total output of 20 GWh per year was announced by BYD. To ...
