

Buenos Aires plasma battery production facility

Where will lithium batteries be made in Buenos Aires?

State company Y-TEC, the tech arm of YPF, will open the first lithium battery cell factory in September, in La Plata, the capital of Buenos Aires province. Another plant, five times bigger, will kick off in Santiago del Estero in 2024.

How many people can a lithium battery power Buenos Aires?

The plant will generate 15 megawatts per year, which means it will produce lithium batteries capable of powering 2500 households. The batteries are envisaged for use in rural areas. For example, there is already a Buenos Aires province-backed project to supply the Paulino-Berisso island, home to 70 families who are currently off the power grid.

When will Argentina's first lithium plant start production?

Argentina's first National Plant for the Technological Development of Lithium Cells and Batteries will start production in September on the premises of the National University of La Plata (UNLP). Y-TEC (a subsidiary of the state-owned oil company YPF) head Roberto Salvarezza announced Thursday.

Is Eramine Sudamerica launching its first lithium carbonate plant in Argentina?

Eramine Sudamerica is gearing up to inaugurate its first lithium carbonate plant in the northern Argentine province of Salta by July 2024. This strategic move is set to establish the company as Argentina's fourth producer of lithium, a critical component in battery technology, according to a Reuters report posted on the Economic Times.
