What does a capacitor symbol look like?

The capacitors symbol consists of two parallel lines, which are either flat or curved; both lines should be parallel to each other, close, but not touching (this is actually representative of how the capacitor is made. Hard to describe, easier to just show: (1) and (2) are standard capacitor circuit symbols.

What is the schematic symbol for a capacitor?

The schematic symbol for a capacitor actually closely resembles how it's made. A capacitor is created out of two metal plates and an insulating material called a dielectric. The metal plates are placed very close to each other, in parallel, but the dielectric sits between them to make sure they don't touch.

Which symbol represents a polarised capacitor?

The symbol on the left represents a polarised capacitor - it has a positive and negative lead. The symbol on the right represents a non-polarised capacitor - it can be connected either way around in a circuit. Capacitors have values that are given in Farads (symbol F).
