What happened to battery energy storage systems in Germany?

Small-scale lithium-ion residential battery systems in the German market suggest that between 2014 and 2020, battery energy storage systems (BESS) prices fell by 71%, to USD 776/kWh.

Are battery electricity storage systems a good investment?

This study shows that battery electricity storage systems offer enormous deployment and cost-reduction potential. By 2030, total installed costs could fall between 50% and 60% (and battery cell costs by even more), driven by optimisation of manufacturing facilities, combined with better combinations and reduced use of materials.

Are lower prices good for EVs and stationary storage markets?

Markets: Lower prices are good for EVs and stationary storage markets. Stationary storage additions should reach another record, at 57 gigawatts (136 gigawatt-hours) in 2024, up 40% relative to 2023 in gigawatt terms.

Why are China's EV battery cell suppliers fighting irrational buying behaviour?

EV battery cell suppliers, especially those in China, have been locked in a heated battle for market share for years. Fears of critical raw material shortages at a time when global EV demand was achieving growth rates of +60% stoked irrational buying behaviour. The result was a 270% increase in lithium carbonate costs from Q3 2021 to Q4 2022.
