

China cuts taxes on solar PV imports

Will China reduce the export tax rebate for solar panels?

(Illustrative Photo; Photo Credit: humphery/Shutterstock.com) The Chinese Ministry of Finance and the State Administration of Taxation have revealed that the country will reduce the export tax rebate for 209 products, including solar PV cells and modules from 13% to 9%, starting from December 1, 2024.

How much will China's Export tax rebate rate drop from 1 December 2024?

From 1 December 2024, the export tax rebate rate will drop from 13% to 9% on some PV and batteries products. Image: Rinson Chory, via Unsplash. China's Ministry of Finance and the State Administration of Taxation have issued an "Announcement on Adjusting the Export Tax Rebate Policy".

Which PV products have reduced export tax rebate rates?

According to the above-mentioned government announcements, PV products included in the list of products with reduced export tax rebate rates are for PV cells, either installed or not in modules.

Why is the solar export tax rebate coming down?

For solar, the rebate has been available since 2003. According to industry experts, the move to bring down the export tax rebate is aimed by the administration at checking overcapacity concerns because of which prices in the PV industry have dropped to record lows.

Will China phase out export tax rebates?

Some industry analysts, who spoke to pv magazine on condition of anonymity, said the tax rebate reduction is part of a longer-term strategy. With Chinese PV products dominating global markets, they said that the government might eventually phase out export tax rebates entirely.

How will a reduced export rebate affect China's PV industry?

Companies may respond by increasing export prices to offset potential losses. "While the reduced export rebate rate will have minimal impact on production costs for Chinese PV manufacturers, it is likely to provide support for overseas prices, aiding in a potential recovery," said research firm Shanghai Metals Market (SMM).
