

El Salvador promotes lithium batteries

Are lithium-ion batteries a strategic resource?

This article explores the geopolitical relations and interdependencies emerging in the lithium extraction and manufacturing of lithium-ion batteries. It discusses the characteristics of the lithium-ion battery supply value chain to argue that lithium is not just a strategic resource.

What energy sources does El Salvador use?

El Salvador is increasingly turning to indigenous renewable sources of energy such as hydropower, biomass, solar PV and geothermal energy. In 2019, more than two-thirds of the country's total energy supply came from imported fossil fuels.

Will Latin America's 'Lithium Triangle' lead to an increase in lithium demand?

Latin America's 'Lithium Triangle' accounts for over 60% of lithium reserves, creating commercial opportunities tied to lithium's role in electric vehicles and alternative energy storage, which the World Bank estimates may lead to an increase in lithium demand of 488% by 2050.

Can geothermal energy be used in El Salvador?

The promotion and production of geothermal energy in El Salvador will be a key area of focus. Despite a long tradition of geothermal energy use, its development has slowed in recent years with a limited number of new projects for power generation or heating applications brought online.

What are El Salvador's green energy ambitions?

El Salvador's Green Energy Ambitions: 95% Renewable Projects Set to Transform the Nation in 2024. - El Salvador in English El Salvador's Green Energy Ambitions: 95% Renewable Projects Set to Transform the Nation in 2024.

What role does Latin America play in the lithium industry?

Latin America is a major global player in the lithium sector, with a high degree of specialization in the extraction of the resource and the production of lithium compounds .-- III. Governance models .-- IV. Concluding remarks: guidelines for a productive development agenda around lithium.

El Salvador is in the process of implementing a new long-term national energy policy 2020 - 2050, which aims to reduce electricity tariffs in the country by prioritising ...
