

First time charging of new wound battery

How much charge does a battery have if properly treated?

So properly treated the battery will have less than 50% charge when you get it. Why are they recommending or even insisting on getting you to charge? Because when you first get a device ,you spend a long time configuring it and testing it.

Should you charge a lithium ion battery first?

There is no reason that charging a Li-ion battery up the first time before playing with your new device, would in any way extend the life of the device or the battery. The simple fact is properly stored lithium-ion batteries are charged to about 50%, and lose some of that charge (depending) while sitting around in the package, or being shipped.

Does a battery charge matter if it's a 'first charge'?

It shouldn't matter from. The real 'first' charge is done at the factory right after manufacturing. Devices with Li-Ion batteries are usually shipped with ~60% charge which is supposedly ideal for long term storage. The only reason I can think of is to allow software to calibrate properly.

How long should I charge my new laptop battery?

Some manufacturers recommend charging the battery beyond 100% for a few hours to calibrate the battery. However, this isn't necessary in most cases as modern laptops automatically calibrate the battery. Should I charge my new laptop for 8 hours? It is not necessary to charge your new laptop battery for a specific amount of time.

How do you charge a laptop battery for the first time?

Plug the laptop's power cord into the power port, then into the wall. Let the laptop charge for 24 on this first charge, or just until it's completely charged, which experts say helps extend the battery's lifespan. Then, unplug the battery and use the laptop as normal. How do I charge a laptop battery for the first time?

When should I charge my mobile phone?

It primarily depends on when and for how long you charge your mobile phone. Important: Precisely when you should charge your mobile phone depends on the intensity of use, i.e. at what percentage you charge the battery. For a long battery life, avoid completely draining the battery and end the charging process once the device is charged.
