

# Flexible solar panel fixing method video

How to install a flexible solar panel?

Apply a generous and even layer of adhesive on the back of the flexible solar panel. Make sure you cover everything, from corner to corner. Carefully align your panel with the marked positions on your mounting surface. Precision at this stage will make the difference between a professional-looking job and a clumsy DIY project.

How to install a flexible panel?

For flexible panel, please use silicone structural adhesive for installation. Please apply silicone without any gap. The thickness of the adhesive should not be less than 4 mm, and the width should not be less than 10 mm. If possible, apply adhesive on the center of the back of the panel to enhance installation liability.

What do I need for a flexible solar panel?

You're going to need the flexible solar panels - refer to our top picks on our ["/flexible-solar-panels"](#) page. You'll also need a high-quality adhesive, a measuring tape, a clean cloth, and your personal protective equipment (PPE), such as gloves and goggles. Make sure your work surface is flat and stable.

Are flexible solar panels better than rigid solar panels?

Traditional rigid solar panels have their place, but in some scenarios, flexible solar panels are distinctly advantageous. Imagine you're decking out your RV or remodeling your boat - you'd prefer the smooth contour of flexible solar panels over the boxy rigidity of traditional panels.

How do you install a solar panel?

Remember, solar panels need maximum exposure to sunlight, so place them accordingly. Attention to detail is key here. Apply a generous and even layer of adhesive on the back of the flexible solar panel. Make sure you cover everything, from corner to corner. Carefully align your panel with the marked positions on your mounting surface.

What should I do if my solar panel flies off the roof?

Please make sure to hold flexible panel properly to distribute force evenly. Carrying the panel improperly may result in solar cell damage and solar panel output decrease. Fully apply adhesive to the windward side which protects the panel against wind and rain. Panel may fly off the roof when driving vehicle at high speed.
