

Government's plan to attract battery companies

What is the Advanced Manufacturing Plan & UK battery strategy?

The UK has a proud manufacturing heritage. The Advanced Manufacturing Plan and UK Battery Strategy are a major step forward in ensuring its continued long-term success. I shall place copies of the Advanced Manufacturing Plan and the UK Battery Strategy in the Libraries of the House.

Why is the UK battery strategy important?

That conclusion reinforces the importance of acting at pace now to develop a battery supply chain in the UK. (Paragraph 87) A) The UK Battery Strategy has set out the Government's activity to support our objectives and established the framework and priorities for our future work with industry, on both the batteries of today and of tomorrow.

Why is the UK investing in battery manufacturing?

The UK government is committed to continuing to invest in UK battery manufacturing. This strategy builds on our impressive track record of targeted government support, leading to a pipeline of investments through the battery ecosystem:

What should be included in the UK battery strategy?

1. In the forthcoming UK Battery Strategy, the Government should specify the extent to which future demand for batteries in the UK should be supplied by domestic sources in 2030 and 2040, along with a 10-year plan for scaling-up this capacity and an estimate of the public money required to do so.

Do we need a battery strategy?

Stephen Phipson, chief executive of Make UK, said a battery strategy is welcome and much needed. "Having a joined-up battery plan in place will be critical for the UK economy to benefit fully from new technological opportunities going forward, and we must ensure that manufacturing involves the entire supply chain [...]," he commented.
