

How about after-sales dedicated batteries for conversion equipment

Why should OEMs start planning for the emergence of battery electric vehicles?

It is critical for OEMs to start planning for the emergence of battery electric vehicles (BEVs) as this trend has the potential to have the biggest impact on aftersales in the short term. Global sales of BEVs reached more than one million units for the first time in 2017 increasing 54 per cent over 2016 and surpassed two million units in 2018.

Are EVs a good option for Aftersales?

The available aftersales revenue on a three-, four- or five-year old and older EV will be considerably less than for an equivalent ICE (internal combustion engine) vehicle meaning that the potential revenue available will decline.

Why is after-sales service important in the automotive industry?

The automotive industry is undergoing a period of rapid and transformative change. With the emergence of electric vehicles and ever-increasing technological advances, the need for efficient and effective after-sales service has never been greater.

Can AR revolutionise Aftersales Services?

AR has the potential to revolutionise aftersales services by enhancing communication and collaboration, improving customer experience, and boosting dealer profitability. Volkswagen Group UK, for instance, has adopted AR Remote Assistance to support servicing electric vehicles.

How has the EV industry changed over time?

These changes have had a profound impact on the aftersales segment. For instance, the shift to electric vehicles necessitates overhauling service bays, supply chains, and equipment. Dealerships are also investing in new training and processes to handle the unique demands of EVs.

Will the EV market grow from aftersales?

The EV market is attracting a number of start-ups and new entrants (including established brands with no automotive industry experience). However, from the outset, their future revenue potential from aftersales will not be at the same level that established OEMs have been able to achieve.
