How are the solar panels I bought from Vipshop

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

Can solar panels save you money?

Or read the full guide below for detailed info. Solar panels could help you save £100s a year on your electricity bills. Using the energy you generate can mean big savings for some households. You can get paid to export electricity you generate but don't use through the smart export guarantee (SEG). An average home could earn up to £320/year.

How do I choose a solar panel brand?

It's unusual to choose a specific solar panel brand at the outset. Instead you're likely to encounter different brand options as you get quotes from different installers. Typically, your chosen installer will buy the panels to fit on your home. Some only install solar panels from one brand, while others may install panels from a few brands.

How much do solar panels cost?

As well as saving you money on energy bills, solar panels can earn you cash. And don't worry, they can still generate electricity on gloomy days, vital when the weather's as dull as dishwater. But they cost an average of £7,000, so you need to understand how to work out if the sums add up. 1-min read: Solar panels - key need-to-knows and how to buy

Can you make money from solar panels?

Plus,you can actually make moneyfrom your solar panels. When your panels generate more electricity than your household can use,this excess electricity can be exported to the grid to be used by others. And as long as both you and your supplier are signed up to the Smart Export Guarantee (SEG),you'll be paid for that surplus electricity.
