

How to choose Swiss batteries

How to choose a wrist watch battery?

To choose a wrist watch battery, you need to consider the following factors: **Compatibility:** You need to make sure that the battery you choose is compatible with your watch model and movement. **Quality:** You need to choose a high-quality battery that has a long shelf life and a reliable performance.

What size battery does a Swiss army watch use?

Find the Battery Size of a Swiss Army Watch Once the back is open, you'll be able to view the inner components of the watch - including the cell battery. With a magnifying glass, look at what battery size powers your Swiss Army. Swiss Army usually use a 370 (SR626SW), 389, or CR1225.

What battery does Swiss Army use?

Swiss Army usually use a 370 (SR626SW), 389, or CR1225. We recommend using a quality brand such as Duracell or Renata when replacing the battery of your Swiss Army watch. At our repair center, we stock all three battery sizes - as well as dozens of other sizes. Duracell 370/371 Silver Oxide Button Battery, 1... 3.

Can I use a SW battery in a watch without a backlight?

Well, you would tend to only use a SW battery in a watch without a backlight. Your standard analogue quartz watch would be fine with a low drain watch battery, whereas a watch which used a backlight would need a high drain watch battery.

Which battery is best for a watch?

Alkaline batteries are among the most common and the least expensive. Unfortunately, they often have an inconsistent voltage that can affect accuracy. Lithium batteries are smaller and have a longer lifespan (up to a decade in a low-drain watch). However, if your watch has lights or other features it will use up the battery faster.

How do I replace a Swiss Army battery?

Once the Swiss Army battery is accessible, insert your tool of choice into the opening. Slowly ease the old battery from the casing. Unpackage your new battery and replace it in the same spot. Gently press the new battery into position, and reclip if necessary.
