How do I choose a solar panel?

When selecting a solar panel, consider your available space, the surface you'll be mounting it on, and whether you want a portable or permanent installation. Then move on to determining how many panels and what rated power and efficiency they need to meet your electricity consumption needs.

How to choose a solar panel for a portable power station?

Solar panels with a higher rated power have the capacity to produce more electricity. If you want to generate more energy using less space, then a panel with higher rated power output is the better choice. Remember to check the solar input/charge capacity of your portable power station or other balance of system carefully.

Do solar panels need a battery?

But solar panels only generate electricity while the sun shines, and your PV panels absorb the photons in sun rays. Unless you opt for a grid-tied system, you must store the electricity your panels generate in a solar battery. For off-grid solar power systems, a solar battery and other balance of system components are essential.

How many solar panels do I Need?

Having sufficient roof space. To install a 4kW system of 350W solar panels, you'd need about 10 solar panels, requiring around 16 m<sup>2</sup> of roof space. For a 5kW solar panel system, you'd need 13 solar panels and 26 m<sup>2</sup> of roof space. It's important to have sufficient roof space, with at least 30 cm of space around the panels.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

How do I choose a solar panel for my roof?

Decide on how much of your electricity bills you want to cover with your solar panel usage -- this can be anything from 10-100%. Your decision will affect the system size and costs. Calculate how many solar panels fit your roof. An average solar panel takes about 1.44 m<sup>2</sup> of roof space. Don't forget to include at least 30 cm from the roof's edge.
