

How to choose and maintain batteries

What is the best maintenance for a car battery?

The best maintenance for a car battery is to regularly drive the car it's fitted to. But there are some other things you can do, as well. If the car is off the road for a while, disconnect the battery from the car's electrical circuit and/or connect it to a charger. Also keep the battery terminals nice and clean.

How to maintain a car battery for a long time?

Another simple tip that can help you maintain your battery for longer is to check the battery's water levels. If the battery plates are fully covered, it means that your water level is where it should be. However, when the battery plates are exposed, it means that the battery fluid level is low.

How often should a car battery be serviced?

For comprehensive car battery maintenance, every month you'll want to conduct a battery load test, which can be done by a mechanic. This car battery service is to ensure that the device can charge properly, even in freezing temperatures. 5. Clean the battery Dirt and debris can be bad news for your car battery if it gets into the cells.

How to keep a car battery healthy?

The best thing you can do to keep a car battery healthy is to just drive the car regularly. About 30 minutes once a week is sufficient. If you only drive your car once or twice a week, make sure you turn off all the electrical equipment, such as the lights and aircon, before getting out of it.

Do I need a battery health check?

At your car's regular service, the battery should be checked by the mechanic. But if you have any concerns about your battery, at Halfords we offer a Free Battery Health Check where we'll check the condition of your battery and let you know if a charge or replacement is needed.

How do I choose a car battery?

It is crucial to choose a battery that matches your vehicle's specifications. Consult your car's manual or seek professional advice to determine the correct size and type required. Cold Cranking Amps (CCA): CCA measures the battery's ability to start the engine in cold temperatures.
