

# How to deal with solar installation and roof leaks

How to prevent roof leaks after solar panel installation?

To prevent roof leaks after installing solar panels, regular maintenance is key. Schedule checks to ensure the solar panel system and roof are in good condition. Promptly addressing any signs of deterioration can help prevent leaks and extend the longevity of your roof and solar panels.

Do solar panels cause roofs to leak?

Solar panels rarely cause roof leaks. When roof leaks occur after solar panel installation, they usually become evident within the first year.

How can I prevent post-installation roof leaks?

To prevent roof leaks after installing solar panels, regular maintenance, proper installation, and professional oversight are key factors. Preventing post-installation roof leaks is possible with awareness and proactive steps, allowing renewable energy benefits while safeguarding your property.

How do I protect my roof from leaking & damage?

To protect your roof from leaking and damage during solar panel installation, the first thing you should do is hire a qualified solar installer to evaluate your roof and make a plan for fitting the panels. This is the single most effective defense against such issues.

Can solar panels be installed on a roof?

Most modern roofs are compatible and able to withstand the installation of solar panels, but in some cases, the roof material is susceptible to leaks. If your roof is made from clay, terracotta, wood shingles, or slate, there is an increased risk of leaks developing through the installation.

Can a new solar installer damage a roof?

New or inexperienced solar installers, or those working with inexperienced sub-contractors, may inadvertently damage the roof during installation and make it vulnerable to leaks during rain or snowstorms. Reputable solar installers understand how to work with roofing and sub-roofing materials to ensure a tight fit and no leaks.
