

How to deal with the battery

What should you do if a battery goes bad?

Work in a well-ventilated area to help diffuse fumes. Wear eye protection--ideally full goggles, but safety glasses are better than nothing. Wear gloves to prevent skin contact with battery chemicals. Have a pair of long, blunt tongs available to help safely move a damaged battery.

How to care for a swollen battery?

Protect batteries against being damaged especially from being crushed,punctured,or immersed in water. Replace the battery if it is damaged or no longer performing as it should. Store the device in a cool,dry environment. Hot cars and humid environments are not good for battery health. **HOW TO DEAL WITH A SWOLLEN BATTERY?**

Can You puncture a swollen lithium-ion battery?

Do not ever try to puncture the bulge in your lithium-ion battery. Swelling of lithium-ion batteries is caused due to heat and build-up of gases, which make the battery vulnerable. Puncturing a swollen lithium-ion battery may lead to fire and explosion.

Can you leave a swollen battery inside a device?

Removal and disposal of a swollen battery can be dangerous,but leaving a swollen battery inside a device can also cause serious harm. Read all warnings carefully and proceed at your own risk. All batteries are hazardous waste and must be disposed of properly. If your device feels extremely hot,or smells awful,don't attempt to remove the battery.

How do I dispose of a battery?

Do not put/store the battery in water. If the battery is warm,smelly or smoking,put it outside away from flammable materials,or in a fireproof container,and wait for the symptoms to dissipate. When safe,take the battery to a local e-waste collection site; refer to our e-waste page to find one in your area.

What should I do if my battery is heating up?

When you notice your battery is heating up,the first thing you should do is remove it from the device it's in. Do not try to handle or move the battery with bare hands or use it in any way. Keep it away from flammable materials as well. Once you have safely removed the battery,you need to dispose of it properly.
