

# How to install solar energy on the roof of a self-built house

How to install solar panels on a roof?

Take into account the roof orientation of the panels and ensure that the mounting framework is slightly tilted, usually between 18 and 36 degrees. Some companies use solar trackers to improve the efficiency of energy conversion. Following the mounting setup, the solar panels are securely attached to the mounting structure.

How do I install solar panels?

The first step in the solar panel installation guide is to install the mounts that will support the solar panels. These come in three primary types: pole, roof-ground, and flush mounts. Depending on the chosen mount, you can place solar panels on an RV, a rooftop, or even as a standalone device.

Should you use solar panels when building a new home?

Today, when building a new home, it is required that you include energy saving measures and offsets such as cheap new build solar panels. These include solar panels or solar thermal systems. Solar panels do not need to detract from the attractiveness of your new build.

Can solar panels become a roof?

In some cases, solar panels can become the actual roof. This is known as BIPV, building integrated solar panels. They improve sale-ability by reducing the building's electricity costs. The financial benefits of solar installations in new builds are significant.

Why should you install solar panels on your roof?

The rooftop solar panels are space-saving, cost-efficient aids that increase the roof's strength and reduce your electricity bill by ensuring abundant energy. Let's discover eight steps for installing solar panels on the roof, helping you reap optimal benefits from installing solar rooftop panels.

Can solar panels be added to a new build?

For new builds and self-builds, you'll likely be looking at solar photovoltaic panels and/or solar hot water (solar thermal) systems. Instead of looking at options to traditional heating systems, solar panel installations can be added to new builds to improve the EPC and overall energy efficiency.

To install the solar panels onto your roof, you need to secure it to a railing (which is sort of like a rack), which is then fixed to your roof. Fixing the railing to the roof joist means you will need ...
