

# How to install the battery panel on the rear shell of the communication network cabinet

How do you reinstall a battery cabinet?

Reinstall the left side panel on the left-most battery cabinet after interconnection. Push the third battery cabinet into position, align with the seismic anchoring (if any), level the battery cabinet, and interconnect with the other battery cabinets as described in step 2, step 3, and step 5.

How do you level a battery cabinet?

Remove the side panels that are adjacent to the other battery cabinets. Push the right-most battery cabinet into position. For seismic anchoring, ensure that the rear seismic bracket connects to the rear anchors. Lower the levelling feet until they connect with the floor - use a bubble-level to ensure that the cabinet is level.

Where is the cable entry on a 93pm ups?

through the bottom (only Large Battery Cabinet) Cable entry to the 93PM UPS is always on the rear or the bottom of the cabinet. In 30-150 kW UPS models the entry is also located on the bottom of the right side panel. Cable entry to the 93E UPS is on the rear or the bottom of the UPS cabinet.

How are ups installed?

Each cabinet in the UPS system is placed in its installation location. A cabinet grounding/mounting kit is installed between any cabinets that are bolted together. All conduits and cables are properly routed to the UPS and any ancillary cabinets. All power cables are properly sized and terminated.

What should I look for in a ups installation manual?

Observe all DANGER, CAUTION, and WARNING notices affixed to the outside of the equipment. The intended audience of this manual is people who plan the installation, install, and use the UPS. This manual provides guidelines for checking the delivery, installing, and operating of the battery cabinet.

How many battery cabinets are available for the 93pm and 93e?

For the 93PM and 93E product lines, there are two different battery cabinets: Small and Large Battery Cabinet. The battery block configuration in the chosen battery cabinet must always match the UPS requirement. Used battery configuration must be inserted into UPS settings during commissioning or start-up.

Install the ten interconnection screws (five in the front and five in the rear) between the two battery cabinets.  
NOTE: To reach the five interconnection screws in the rear of the left-most battery ...

Push the sliding base of the battery cabinet back to the initial position, install the four sheet metal screws at the front and rear of the base, and reinstall the transport fixing supports on the top of ...
