

How to record the installation of solar panels

How do I install a solar panel?

Installing your solar panel is a straightforward process though calling in professional installers is recommended. Making sure these installers are accredited by MCS is highly important, so as to ensure a high standard of installation. Is my home suitable for solar PV panels? A solar panel will be most effective if you have a south-facing roof.

How many solar panels are installed a week?

Over 3,000 installations are being carried out each week according to trade association Solar Energy UK. The solar panel installation process, however, remains relatively unknown. You might be wondering if you can take care of it yourself or if you'd be better to call in a professional. And how much would it cost?

How does a solar panel installation work?

Mounting the panels: The installers will begin by securing mounting brackets to your roof or the ground (if it's a ground-mounted system). The panels will then be securely attached to these mounts. - Electrical wiring : After the panels are mounted, the electrical wiring will be connected to the inverter and electrical panel in your home.

How long does it take to install a solar inverter?

The installers will set up the inverter by the breaker panel, a sort of hub for all electrical circuits within your home. The installation process will take around 4 to 6 hours. If you have decided to also buy a solar battery, enabling you to store energy produced by your panel for later consumption, then the inverter will be connected to it.

Should you hire a certified solar panel installer?

Your solar panel system installation should be quick, efficient, and minimally disruptive to your life and home. To make sure your panels go up without too much fuss - and are set up to generate the most electricity possible - you should hire an accredited, certified installer, like Sunsave.

Do you need planning permission to install solar panels?

Get inspired with our guide to great projects with different solar panels ideas which seamlessly integrate solar panel installation with their home design. "Solar panels are usually installed under General Permitted Development Order (GPDO) which means that you would not need a separate planning permission application," David says.
