

# Is it necessary to install solar cells

Do you own solar panels?

You OWN the solar panels. Under these schemes, you pay for solar panels over a fixed period, say 20 years. There are no upfront costs, and instead you pay a monthly fee, which usually covers the solar panel and battery installation, repairs and maintenance.

Should solar panels be installed on new homes?

Realistically, if solar panelling is the way we are heading in the UK, this needs to start with new builds. It is vastly cheaper to install solar panels on a new property than it is to fit them retrospectively after a family moves in.

Do solar panels need a battery?

Some people also decide to pair their solar panels with a solar battery, which will store excess solar energy to be used on cloudy days or during the night time. If you have a solar battery in your system, the battery also needs to be connected to the inverter at this point. Find out more about how solar batteries are installed on our page.

How to install solar panels?

Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5. Erect the scaffolding (this can be done by your supplier or by a company you organise) 6. The solar panel mounts will be installed 7. The professionals will install the solar panels 8.

Do you need planning permission to install solar panels?

Get inspired with our guide to great projects with different solar panels ideas which seamlessly integrate solar panel installation with their home design. "Solar panels are usually installed under General Permitted Development Order (GPDO) which means that you would not need a separate planning permission application," David says.

Why should you install solar panels on your home?

Installing solar panels lets you use free, renewable, clean electricity to power your appliances. You can sell extra electricity to the grid or store it for later use. There are over 1.3 million installations on homes across the UK - see where the UK solar panel hotspots are.
