

It is now popular to install solar panels

Why do people install solar panels?

Solar panels are often marketed as a way to save money on electricity- and sometimes as a way to make money too. This is because you can get paid for the electricity they produce that you don't use. Of course, many people install solar panels for other reasons.

Are solar panels worth it?

The pros of solar panels are immense, and if you can afford the upfront cost they are absolutely worth getting. With solar panels, the average three-bedroom home will save \$454 a year on their energy bills. And if you're exporting excess electricity to the grid via the SEG, you'll make an additional \$160 per year.

Are solar panels a good investment?

Over the past decade, the cost of solar power has halved, making it a more attractive option for homeowners. With gas prices on a rollercoaster and climate change concerns mounting, solar panels are expected to become even more cost-effective in the future. After installation, solar panels start saving you money on energy bills immediately.

Are solar panels more effective than ever before?

Solar panels have come on leaps and bounds in the past decade and are now more effective than ever before. The average solar array now converts around 18 to 22% of sunlight it absorbs into electricity- up from 12% a mere 10 years ago, according to BBC News.

How much do solar panels cost?

As well as saving you money on energy bills, solar panels can earn you cash. And don't worry, they can still generate electricity on gloomy days, vital when the weather's as dull as dishwater. But they cost an average of \$7,000, so you need to understand how to work out if the sums add up. 1-min read: Solar panels - key need-to-knows and how to buy

Are solar panels worth it in the UK?

Solar panels are definitely worth it in the UK.
