Which solar panels are best for your home?

SunPower, REC, Panasonic, Moxon, and Jinko Solar offer the best solar panels. The type of solar panel, power output, efficiency, performance in warm climates, warranty, and price are the key factors to assess when comparing solar panels. The best solar panel for your home can depend on your roof space, shading, and climate.

How do I choose the best solar panels?

For example, solar panels with the highest power ratings are ideal for large households, while more efficient panels are a better choice for small roofs and homes that don't get much sunlight. We'll offer more guidance on choosing the best solar panels for you in our buyers' guide, below.

Are solar panels suitable for my home?

However, to install solar panels, it's essential to have enough roof space, adequate sunlight, and a structurally sound roof to support them. You can easily find out if solar panels are suitable for your home by using the checklist below. Let's take a closer look at these hard requirements: Having sufficient roof space.

What makes a good solar panel?

Here are the key factors that helped us narrow down our selection, first to the top 48 models and then to the nine best: Power - Measured in watts (W), power refers to a solar panel's peak energy production in standard test conditions. A 300W panel would produce 1,500 watt-hours (1.5kWh) of electricity in five hours.

How many solar panels does a 3 bedroom house need?

The typical three-bedroom house needs 10 solar panels to cover its electricity usage, so if your roof is old or delicate, it may not be able to hold the biggest and heaviest panels. This makes lightweight, efficient panels an important alternative for anyone with a less reliable roof.

How many solar panels do you need in 2023?

Most solar panels installed in 2023 have a power output between 370 and 400 watts. When you install high-wattage solar panels, you need fewer solar panels to generate the electricity needed to power your home. The average home needs between 15 and 19 panels to cover its electricity usage, but it will vary from home to home!
