

# Local standard number for new energy batteries

What is the new battery regulation?

To respond to the growing demands, the EU has adopted a New Battery Regulation in July 2023, which replaces the previous Battery Directive from 2006 (EU Battery Directive 2006/66/EC). We summarized the Directive and its key changes for you. REGULATION (EU) 2023/1542 of July 12, 2023 on batteries and waste batteries

What are battery safety requirements?

These include performance and durability requirements for industrial batteries, electric vehicle (EV) batteries, and light means of transport (LMT) batteries; safety standards for stationary battery energy storage systems (SBESS); and information requirements on SOH and expected lifetime.

What is considered a battery under the regulation?

Battery cells or battery modules made available for end use without further incorporation or assembly into larger battery packs or batteries will be regarded as batteries under the regulation, subject to the requirements for the most similar battery category.

What are the requirements for a rechargeable industrial battery?

Performance and Durability Requirements (Article 10) Article 10 of the regulation mandates that from 18 August 2024, rechargeable industrial batteries with a capacity exceeding 2 kWh, LMT batteries, and EV batteries must be accompanied by detailed technical documentation.

Are battery energy storage systems subject to environmental permitting?

DEFRA is planning to bring battery energy storage systems (BESS) into the environmental permitting regime. However, some operators may be unaware that they may be subject to it already, putting themselves in potential legal jeopardy.

When does the EU Battery regulation 2023/1542 come into effect?

The first set of regulation requirements under the EU Battery Regulation 2023/1542 will come into effect on 18 August 2024.

Article number: 100151; Journal: eTransportation; Volume: 11; Early online date: 14 Dec 2021; ... Standard Harvard Vancouver Author ... Yang, Qingqing ; Li, Jianwei ; Yang, Ruixin et al. / New ...

The recycling of retired new energy vehicle power batteries produces economic benefits and promotes the sustainable development of environment and society. However, few ...

4 ???&#0183; The government has published new statutory guidelines for businesses producing and

# Local standard number for new energy batteries

distributing lithium-ion batteries for e-bikes, as the latest step in tackling fires caused by unsafe ...

In March 2024, the British Standards Institution (BSI) released new guidelines for battery energy storage systems (BESS) in residential settings, known as PAS 63100:2024. These guidelines aim to enhance safety and ...

A new British Standard for the fire safety of home battery storage installations, which came into force on the 31st March 2024, will have significant impact on how and where ...
