

# Marshall Islands Energy Storage Plan

What is the future of the Marshall Islands electricity system?

The future of the Marshall Islands electricity system depends on upgrading the electricity network, getting better at energy efficiency, and replacing diesel generation with renewable energy in the form of wind and solar. Most of all it depends on our people. Take a look at where we are headed.

What is the Marshall Islands electricity roadmap?

The Republic of the Marshall Islands is calling for ambitious action by all countries to reduce greenhouse gas emissions. We are leading the way by committing to net zero emissions by 2050, with significant milestones along the way. The Marshall Islands Electricity Roadmap presents costed, technically sound pathways to help achieve our NDC.

What is the purpose of the Marshall Islands Electricity Act?

of Association) is to provide electrical or energy services to the population. The Marshall Islands is the only country in the Pacific that has no electricity act and therefore legal mandates and clear responsibilities and functions

What fuel does the Marshall Islands import?

ation turbine fuel and household kerosene), and liquefied petroleum gas (LP). In 2011, the Marshall Islands imported 56 million liters of petroleum fuel. The Marshalls Energy Company (MEC) and Mobil are the main importers, with MEC having very large storage capacity. Based on information for the years 2007 to 2011,

How many SHSS are there in the Marshall Islands?

vided MEC with an electricity subsidy over the last years for the urban areas. It was estimated that, by the end of 2014, and with the completion of the EU/SPC Regional Energy Programme for the Marshall Islands, a total of 3,400 SHSs should be in place, with a government subsidy estimated at USD 530,000 per annum

Why is air transport important in the Marshall Islands?

ic air transport is the largest user of imported fuel in the Marshall Islands. The quality of life and the economic survival of outer island residents is tied strongly to the cost of transporting goods and people to and from Majuro, Ebeye and other islands. It is especially important that the fuel efficiency of sea transport be improved, both through
