

Mobile Solar RV Installation

Can you install solar panels on a campervan roof?

If you answered yes to either of those, solar panels could be your answer. You can install solar panel kits onto your campervan roof and generate free, renewable energy whether you're driving, parked or in storage. We're fitting solar panels to our homes, so why not our home-from-home too?

How to install solar panels on a motorhome?

First, you must determine the best location on your motorhome roof for maximum sun exposure. Then mount the panels, and route the wiring from the solar panels to the charge controller. Then connect the charge controller to the battery bank and test the system to make sure it's all working properly.

How much does a motorhome solar panel cost?

For example, a 10w solar panel kit costs from as little as \$64, whereas our slightly larger, most popular 120w solar panel kit can cost around \$250. Prices of motorhome solar panel installation depends on whether you buy a freestanding panel, roof mounted panel and the type of components you use.

What kind of solar panels do you use for a motorhome?

All kits from Sunstore Solar use the most efficient panels, reliable EP or Victron charge controllers and the same quality cabling and fixings we use on all our own professional solar panel installations. Solar panel kits for motorhomes include capacities from 10w all the way to 400w.

Does Sunstore solar offer a motorhome solar panel installation kit?

Sunstore Solar has created a number of motorhome solar panel installation kits at a range of price points so everyone can benefit from solar energy while on the move. All products are certified and come with long warranties, 30-day money back guarantee and our expert technical support that's readily available by phone or email. Sale! Sale! Sale!
