

# Mobile battery to charge the car

Do you need a portable car battery charger?

A portable car battery charger should be part of your emergency roadside kit. Portable car battery chargers can both charge a battery enough to start it and top off a battery if your car has been sitting over the winter. They are also compact enough to easily tuck into your trunk, so you will always have the charger handy in case you need it.

How much does a car battery charger cost?

Portable car battery chargers start at under \$20, although most quality chargers are in the \$50 to \$100 range. Expect to pay more than this for more advanced features, greater power, or versatility in the types of batteries you can charge.

How to choose a portable car battery charger?

The more adapters included, the more versatile the portable car battery charger will be. For car batteries, a choice of clamps or O-ring terminals is standard. You can also charge the battery from the cigarette lighter in your vehicle with a DC plug adapter. Ease of use Look for a portable car battery charger that is easy to hook up and run.

What is the best portable car battery charger?

1. NOCO Genius10 Smart Charger: Best portable car battery charger Price when reviewed: £130 | Check price at Halfords One of the best names in the business, NOCO has a reputation for delivering innovative features with its battery devices.

Should you keep a battery charger in your car?

Keep one of these portable battery chargers in your car, and you'll be able to start your stricken car easily. Fitted with internal batteries and often doubling as a power bank, these devices are quickly replacing standard battery booster cables as an essential car accessory. They're especially useful during the colder months as well.

Does a car battery charger work on a boat?

This long-lasting, lithium-powered car battery charger is sturdy and can hold a charge for months. Comes equipped with a USB power bank to also charge smartphones and tablets. This car battery charger is water-resistant and has technology that safeguards against the jumper cables surging or overheating. Does not work on boat engines.
