

# New Energy Battery Location

Where is field going to build a battery storage site?

Field is to break ground at its Newport battery storage site in South Wales in the coming weeks. The renewable energy infrastructure company has signed contracts with two key partners to construct the 40 MWh site, which will contribute to the UK's efforts to decarbonise energy supply.

When will field's new battery storage site be up & running?

With contracts signed, the Newport site is expected to be up and running in the third quarter of 2024. Founded in 2021, Field is dedicated to building the renewable energy infrastructure needed to reach net zero, starting with battery storage. Field's first battery storage site, in Oldham (20 MWh), commenced operations in 2022.

Where is SSE Renewables delivering its second battery energy storage system?

SSE Renewables has taken a Final Investment Decision to proceed with, and entered into contracts to deliver, its second battery energy storage system (BESS). The 150MW project is located at the site of SSE's former Ferrybridge coal-fired power station in West Yorkshire, England.

Is this the second-biggest battery storage facility in the world?

A battery storage facility, thought to be the second-biggest of its kind in the world, has been approved by planners. Proposals for the site at East Chickerell Court Farm near Weymouth, Dorset, include 600 battery units containing 2.5 million lithium ion cells.

What is Lakeside Energy Park's battery storage facility?

Lakeside Energy Park's battery storage facility, developed by TagEnergy and now connected to the National Grid at North Yorkshire's Drax substation, is the largest of its kind in the UK. With a capacity of 100MW, the newly energised facility marks a major step forward in supporting Britain's transition to clean energy.

Does Field Newport have a battery system?

Trina Storage, a global leader in advanced energy storage solutions, will supply Field Newport with a fully integrated battery system. Trina Storage's battery solution will include Tier-1 battery racks, Power Conversion Systems, and an advanced software & control system, seamlessly integrated for optimal performance and lifetime.
