

# New Energy Statement Bans the Sale of New Energy Batteries

What is the new battery regulation?

To respond to the growing demands, the EU has adopted a New Battery Regulation in July 2023, which replaces the previous Battery Directive from 2006 (EU Battery Directive 2006/66/EC). We summarized the Directive and its key changes for you. REGULATION (EU) 2023/1542 of July 12, 2023 on batteries and waste batteries

Will new laws affecting batteries be aligned with the batteries regulation?

EUROBAT executive director Rene Schroeder, said the European Commission must now ensure any new laws affecting batteries -- such as upcoming end-of-life vehicles legislation and proposals to restrict certain substances and materials used in batteries -- are aligned with the Batteries Regulation to ensure consistency.

What is the new battery category?

The new category comes alongside the existing portable, automotive and industrial battery classes. Global demand for batteries is set to increase 14 fold by 2030 and the EU could account for 17% of that demand. This is mainly driven by the rise of the digital economy, renewable energy and low carbon mobility.

When will a battery be implemented?

The measures are described in Article 7 and include several stages: Depending on the battery type and level, different deadlines apply for implementation, which are to start from 2025. Details on the technical implementation will be gradually accompanied by delegated acts or implementing acts of the EU.

What are the new battery recycling rules?

Under the new rules, minimum levels of recovered cobalt (16%), lead (85%), lithium (6%) and nickel (6%) from manufacturing and consumer waste must be reused in new batteries. The new rules foresee that batteries will need to be easier to remove and replace, while consumers are better informed.

What does the new battery law mean for Europe?

The new law will ensure that batteries are collected, reused and recycled in Europe and will support the shift to a circular economy.

Worldwide, yearly China and the U.S.A. are the major two countries that produce the most CO<sub>2</sub> emissions from road transportation (Mustapa and Bekhet, ...

This will be addressed by other legislation - such as the renewable energy directive and the new battery regulation - making sure the production process is CO<sub>2</sub>-neutral, ...

In March 2019, Premier Li Keqiang clearly stated in Report on the Work of the Government that "We will
