

New energy battery power cannot be displayed

Why is windows 11 power & battery setting page not displaying information?

If the Windows 11 Power & battery setting page is not displaying any information, you need to check if there are any Windows 11 updates available. For instructions on how to check for Windows updates, see Windows 11: How to Check for Windows Updates. This issue has been resolved in updates that were posted after the initial Windows 11 release.

What's new in power & battery settings?

As part of the update, on the "Power & battery" page, the "Battery usage" settings are now being renamed to "Energy & battery usage." Also, the section now shows energy usage data as well as battery level.

How to enable energy & battery usage settings on Windows 11?

This guide will teach you the steps to enable the new Energy & battery usage settings on Windows 11. To enable the new energy and battery usage settings, use these steps: Open GitHub website. Download the ViveTool-vx.x.x.zip file to enable the new energy settings. Double-click the zip folder to open it with File Explorer.

Why can't I see the battery icon on Windows 10?

If you can't see the battery icon on the Windows notification area, it might be a system setting issue. You can follow the steps below to help resolve the issue: Press and hold or right-click an empty area on the taskbar and select the Settings option.

How do I enable the new energy and battery usage settings?

To enable the new energy and battery usage settings, use these steps: Open GitHub website. Download the ViveTool-vx.x.x.zip file to enable the new energy settings. Double-click the zip folder to open it with File Explorer. Click the Extract all button. Click the Extract button. Copy the path to the folder. Open Start.

Why does the display not power up?

The display does not power up. The screen is blank and the back-light is off. The display is powered from the solar charger. The solar charger is powered from either the battery or the PV array. If the PV voltage and the battery voltage are both below 6V, the display will not power up.
