

Niger Battery Industrial Park Project

Who financed a solar power plant in Niger?

The European Union, the French Development Bank and the government of Nigerco-financed the installation. A French consortium made up of Akuo and Sagecom has finished building a 30 MW solar power plant in Gorou Banda, Niger. The Niger government had initially planned the project to have a capacity of 50 MW.

What is Niamey's new power plant?

The facility, which is located about 10 kilometers from the capital, Niamey, was developed as part of improving the city's electricity supply under the aegis of the national electricity company, Nigelec. Production will hit 53 GWh in the first year and will be fed into the Nigelec network. The project secured EUR30 million.

How can Niger balance its energy mix?

This transformative project, funded by the World Bank through the International Development Association (IDA), will enable Niger to better balance its energy mix, which is currently largely dominated by thermal energy. This initiative is particularly crucial for a country that frequently faces climatic shocks.

Does Niamey have an electrification rate?

In 2020, Niamey had an electrification rate of 92.95% according to figures from the national statistics institute. However, the city suffers from load shedding, despite the extension of thermal production capacities in 2017.

In September, the two parties will sign a joint venture agreement on nickel mining with an investment value of US\$9.8 billion. The project will absorb 20,000 workers. [READ the ...](#)
