

# Nordic backup battery spot trading

What does Nordic batteries do?

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems. At Nordic Batteries we focus on what is important: safety, reliability and performance.

How does the Nordic market work?

The Nordic market is also integrated, in both physical and financial terms, with power markets in the rest of Europe. Financial power trading in Europe takes place on the Nasdaq exchange in Stockholm. Market participants use Nasdaq for price hedging and to trade in long-term products and derivatives.

Why is battery-based energy storage important in the Nordics?

The region is striving to become Europe's clean energy hub and is gaining leadership in the green transition of industry. Battery-based energy storage is a vital addition to the Nordics' energy system to integrate an even higher share of renewable energy from abundant wind and hydropower.

What is the Nordic battery value chain?

The battery value chain builds upon Nordic traditional strongholds such as automotive, maritime, chemicals, manufacturing and mining. Actors within the Nordic battery ecosystem are active on global markets with strong ambitions and devotion to sustainability.

What is the Nordic battery collaboration?

The Nordic Battery Collaboration is a key initiative. The decision to carry out this report was taken by Business Sweden, Business Finland, Innovation Norway and the Swedish Energy Agency together. All parties are financing the report. The report is conducted by Business Sweden.

How many battery-based energy storage systems are in the Nordics?

To date, more than 200 MW of battery-based energy storage systems are operational in the Nordics. In addition, recent announcements and projects under construction amount to more than 450 MW in Sweden and Finland combined, with the pipeline in Sweden accelerating and already accounting for more than two-thirds of the total.
