

Nordic heavy industry energy storage cabinet brand

What is the largest energy storage investment in the Nordics?

"It is a great honor to inaugurate the largest energy storage investment in the Nordics, with 211 MW now connected to the power grid. "Thanks to the efforts of Ingrid Capacity and BW ESS, we are reducing grid congestion and enabling increased power production."

How many battery-based energy storage systems are in the Nordics?

To date, more than 200 MW of battery-based energy storage systems are operational in the Nordics. In addition, recent announcements and projects under construction amount to more than 450 MW in Sweden and Finland combined, with the pipeline in Sweden accelerating and already accounting for more than two-thirds of the total.

What is Sweden's largest energy storage investment?

Sweden's largest energy storage investment, totaling 211 MW, goes live, combining 14 sites. 14 large-scale battery storage systems (BESS) have come online in Sweden to deploy 211 MW / 211 MWh into the region.

How many large-scale battery storage systems are there in Sweden?

14 large-scale battery storage systems (BESS) have come online in Sweden to deploy 211 MW / 211 MWh into the region. Developer and optimiser Ingrid Capacity and energy storage owner-operator BW ESS have been working in partnership to deliver 14 large-scale BESS projects throughout Sweden's grid, situated in electricity price areas SE3 and SE4.

Why is battery-based energy storage important in the Nordics?

The region is striving to become Europe's clean energy hub and is gaining leadership in the green transition of industry. Battery-based energy storage is a vital addition to the Nordics' energy system to integrate an even higher share of renewable energy from abundant wind and hydropower.

What makes the business case for energy storage in Sweden and Finland?

All of this makes the business case for energy storage in Sweden and Finland stronger than ever, drives participation of storage in frequency regulation, and promises a fast return on investment. Ancillary service markets in Sweden and Finland currently offer the following products suitable for energy storage participation:
