

Packaging requirements for energy storage cabinet finished products

What does EU 2015/1094 mean for refrigerated storage cabinets?

Commission Delegated Regulation (EU) 2015/1094 of 5 May 2015 supplementing Directive 2010/30/EU of the European Parliament and of the Council with regard to the energy labelling of professional refrigerated storage cabinets. Directive 2009/125/EC establishes a framework to set ecodesign requirements for energy-related products.

What are the energy labelling and ecodesign requirements for professional refrigeration (PF)?

Energy labelling and ecodesign requirements apply to this product. Professional refrigeration (PF) includes refrigerators, process chillers, condensing units and blast cabinets that are used and/or accessed by professionals in non-household environments.

What regulations apply to refrigerated storage cabinets?

Regulation (EU) 2015/1094 and Regulation (EU) 2015/1095 apply to the refrigerated storage cabinets belonging to the professional sector, i.e. to those appliances intended for use "in non-household environments but not for the display to or access by customers" (Article 2.1.a of Regulation (EU) 2015/1095).

Does a refrigerated storage cabinet need a printed label?

Article 3(1)(a) of Regulation (EU) 2015/1094 states that 'a printed label in the format and containing the information set out in Annex III shall be provided for each professional refrigerated storage cabinet', therefore the legislative text is quite clear on this point. 11.

Why do some materials need a dedicated packaging specification?

1.3.3 Because of their intrinsic specificities, some kinds of materials need a dedicated packaging specification. A SR (Special Requirement) has to be created for certain types of materials. In the cases where an SR needs to be issued the following applies:

How long do items not covered by product specific preservation specifications last?

Items not covered by product specific preservation specifications, shall be preserved and protected for the duration of the shipment and storage cycle to be determined by the EC contract, but no less than a 1 year period from leaving the supplier's facility.
