

Prices of solar panels for domestic use in Western Europe

How much does PV electricity cost in Europe?

The same holds true for the variable part of the electricity price, which can vary between EUR 0.075 and 0.26 per kWh. Nevertheless, PV-generated electricity for the lower ROI financing options, which are more realistic for private consumers, is already cheaper for a large number of European Union citizens.

How much does PV storage cost in Europe?

Therefore, there is a wide range of prices of electricity from storage at EUR 0.18 to 0.36/kWh, which has to be added to the PV LCOE. Some electricity providers in Europe are already offering PV systems and local storage to their customers, often including maintenance services.

Are residential PV solar systems cheaper?

As shown in a growing number of countries, electricity production from residential PV solar systems can be cheaper than the variable part of residential electricity prices, depending on the actual electricity price and the local solar radiation level.

Are PV systems available in Europe?

Some electricity providers in Europe are already offering PV systems and local storage to their customers, often including maintenance services. The packages also include apps to monitor the performance of the system, use of electricity and often functionality to control the match between demand and supply.

How much does electricity cost in Europe?

The average European residential electricity price given by Eurostat 6 for the second semester of 2015 was EUR 0.211/kWh, including fixed charges. Fixed charges vary widely between EUR 20 and 170 per year, depending on the respective Member State and electricity provider.
