

Ranking of new battery companies

Where are the world's largest EV battery manufacturers in 2023?

Asia dominates this ranking of the world's largest EV battery manufacturers in 2023. See which battery makers feature in the top 10.

Which EV battery manufacturer has the largest market share?

According to SME Research, CATL is the world's largest EV battery manufacturer, with 37.7% of the market share. Plus, it is the only battery supplier with a market share of over 30%. CATL has 6 R&D facilities, five in China and one in Germany. In 2023, they spent about \$2.59 billion in R&D, an 18.35% increase from the previous year.

Who makes the most EV batteries in the world?

China is the undisputed leader in battery manufacturing, dominating the global production of essential battery materials such as lithium, cobalt, and nickel. Chinese companies supply 80% of the world's battery cells and control nearly 60% of the EV battery market. 13. Amperex Technology Limited (ATL) 12. Envision AESC 11. Gotion High-tech 10.

Who are the largest and most influential battery manufacturers?

We present the largest and most influential battery manufacturers, exploring their market positions and strategies that have enabled them to dominate the industry. Did you know? China is the undisputed leader in battery manufacturing, dominating the global production of essential battery materials such as lithium, cobalt, and nickel.

Who are the world's leading EV battery makers in 2021?

When IEEE Spectrum provided a snapshot of the world's leading EV battery makers in 2021, China's Contemporary Amperex Technology Co. (CATL) and South Korea's LG Energy Solution were industry's twin titans, each boasting a 26 percent market share.

Which battery maker has the most competitive EV product?

Still, the top three battery makers are responsible for two thirds (66%) of the total battery deployment, which highlights the importance of scale in this business, in order to have the most competitive product on the market. Panasonic, once upon a time a leader in the automotive EV business, has continued its slow slide down the table.

Volkswagen Group's battery company PowerCo and QuantumScape have entered into a groundbreaking agreement to industrialize QuantumScape's next-generation solid-state lithium ...

In this graphic we rank the top 10 EV battery manufacturers by total battery deployment (measured in megawatt-hours) in 2023. The data is from EV Volumes.

Ranking of new battery companies

The largest lithium-ion battery companies worldwide were located in the Asian continent. China, South Korea, and Japan led the ranking in 2023. [Skip to main content](#)

Despite efforts from the U.S. and EU to secure local domestic supply, all major EV battery manufacturers remain based in Asia. In this graphic we rank the top 10 EV battery ...

Fast growing BYD (+59% YoY) is the new silver medalist, with the Chinese everything battery maker jumping from 14% in 2022 to 16% in the same period of 2023 thanks to the rise and rise of the...

Global risk management organisation DNV identified the top ten battery cell ...

Asia dominates this ranking of the world's largest EV battery manufacturers in 2023. See which battery makers feature in the top 10.

Just six companies--BYD, CATL, LG Energy Solution, Panasonic, Samsung SDI, and SK Innovation--were responsible for supplying 87 percent of batteries and battery ...

Fast growing BYD (+59% YoY) is the new silver medalist, with the Chinese everything battery maker jumping from 14% in 2022 to 16% in the same period of 2023 thanks ...

BYD, a Chinese automotive and battery giant, is diversifying its energy storage solutions by constructing a new sodium-ion battery facility in Xuzhou, China. This facility, ...

Global new battery energy storage system additions 2020-2030 Global needs of battery storage capacity in power sector 2030-2050, by scenario Battery market size ...

Global risk management organisation DNV identified the top ten battery cell manufacturers by volume in its 2022 Battery Scorecard report. Here we take a look at the top ...

In February 2023, the company's dominant position in the electric vehicle (EV) battery market was cemented by a report from SNE Research--a South Korean firm, which highlighted Contemporary Amperex ...

Out of these, 1.5K+ new lithium battery companies were founded in the last five years, with 2020 as the average founding year. On average, each of these companies employs about 101 people. Moreover, the average funding ...

Among the Japanese and South Korean battery companies, LG Energy ...

Just six companies--BYD, CATL, LG Energy Solution, Panasonic, Samsung SDI, and SK Innovation--were responsible for supplying 87 percent of batteries and battery metals in passenger EVs in the ...

Ranking of new battery companies

We present the largest, most influential battery manufacturers, exploring their market positions & strategies that have enabled them to dominate the industry.
