

Remote Battery Customer Service

What types of batteries can be used in a universal remote?

Most models will accept several battery chemistry types, to give consumers the option to use disposable or rechargeable cells with a range of capacities. Consult your appliance or universal remote manual to be certain of the kinds of battery that can safely be used in your device.

Do remote controllers need batteries?

Remotes for these devices may lay idle for weeks or months at a time between uses, while others have their buttons pushed hundreds of times per week. Most remote controllers use batteries in the AAA and AA sizes. Manufacturers often ship these products with off-brand, low-power zinc carbon batteries that are quickly exhausted.

What kind of batteries do remote controllers use?

Most remote controllers use batteries in the AAA and AA sizes. Manufacturers often ship these products with off-brand, low-power zinc carbon batteries that are quickly exhausted. Most models will accept several battery chemistry types, to give consumers the option to use disposable or rechargeable cells with a range of capacities.

How long does a car remote battery last?

3-4 years, depending on the brand and type of battery your remote needs. What kind of battery does your car remote use? It depends on your remote. You'll have to open the case of your remote and look at the label on the battery to know for sure, but some of the more common car remote batteries are listed below:
