

# Replace the DC battery

Can a DC-DC converter replace a traction battery?

The DC-DC converter may activate taking power from the traction battery and making the positive cables live in an attempt to recharge the removed battery. The workshop manual gives a complete process for deactivating the 12V system in the car to safely replace the batteries. I doubt it is followed by many.

How do I reassemble my battery pack?

Take out the filter. Locate and remove the 10mm Phillips head screw using a Phillips #1 screw driver. Pull the battery pack down and away from the main body and remove it from the device. To reassemble your device, follow these instructions in reverse order. Give the author +30 points! 8 other people completed this guide.

What do I need to replace my Dyson vacuum cleaner?

Replacement rear soleplate for your Dyson vacuum cleaner. Replacement separator tool for your Dyson cordless vacuum. Contains instructions on how to set up and use your machine. Replacement main body for your Dyson vacuum cleaner.

Can a battery pack be disassembled?

Even once all clips are released, it takes a good deal of force to separate the two halves of the case. Be very careful when releasing the clip between the tower and screw hole, as a slip here could damage the PCB, preventing repair. The released battery pack can be tested as-is or disassembled for use in other projects.

How do I remove a battery Shim?

There are six clips around the main seam that will need to be released, and another one between the "tower" and screw hole on the left in this image. I recommend cutting up a piece of flat, thin plastic (such as a milk bottle) in to shims. Then once you've lifted up the plastic on the battery, slip the shim underneath to keep the clip up.

Does Dyson sell 3rd party batteries?

Dyson does not warrant the use of any 3rd party batteries or parts and assumes no liability for any such use of 3rd party parts or the injuries or damages caused by their use. There are a number of ways you can help to maintain your vacuum battery and maximize its run time. Why not try searching?
