

# Solar Emergency Power Battery

What is an emergency solar kit?

An emergency solar kit is like a superhero utility belt, but instead of magic lassos and grappling hooks, it's got everything you need to generate power from the sun. You can use this power to light up your rooms and power your devices when the power grid goes down.

What is emergency power supply (EPS) for solar?

Emergency power supply (EPS) for solar is a battery function that works to keep your home's lights on during a power cut. Most solar panel systems will automatically disconnect from the grid when it goes down, to ensure the panels don't send electricity through power lines and electrocute the engineers who are working on them.

What are emergency solar power generators?

Also known as emergency solar power generators, these environmentally friendly kits are safer to store and use than traditional gas generators. They can be a literal lifesaver during SHTF situations, power grid outages and outdoor excursions gone wrong. They help you prepare for the unexpected, get out further, and stay out longer.

How much power does an emergency solar power kit use?

If you need emergency power for an entire house or to support power-hungry appliances like air conditioners, you're better off with a 2000-3000W rating. The battery capacity, measured in watt hours (Wh), tells you how much energy an emergency solar power kit can store.

Should you invest in emergency solar power?

One way you can have a backup plan as an American citizen is to invest in an emergency solar power setup. This provides a means for you to harvest the sun's power to generate at least some of your own electricity, giving energy in potentially perilous times. But there are lots of options on the market, so how do you know what's worth getting?

Does Deege solar offer emergency power supply?

At Deege Solar we have options for both automated and manual change over Emergency power supply as well as full grid solutions. EPS is an optional extra that can be added to our Solar PV Packages for home and business owners looking to add security. A double 13A socket can be wired to your solar battery system as an EPS outlet.
