Solar Street Light Portal

What is solar street lighting?

Solar street lighting is an excellent solution for temporary or essential works lighting. Solar lights, using redeployable solutions such as the below concrete blocks, can be installed quickly without the need for a mains connection, providing immediate illumination. This flexibility is beneficial for essential work or emergency repairs.

Is solar street lighting a viable solution in the UK?

Solar street lighting is becoming an increasingly attractive and sought-after solution in the UK.

Is solar street lighting a sustainable choice?

With solar lighting, you're in control of your lighting needs. Once installed, solar street lighting operates at virtually no cost. With no ongoing electricity expenses, solar street lighting is not just a sustainable choice, but a financially savvy one. This is especially true as global energy prices continue to rise.

Are solar street lights energy independent?

Become energy independenttoday with Sun-Lite. Our solar street lights use the latest LED lighting technologies to guarantee a longer lifespan for your road lighting. They also operate well in cold temperatures, making them the perfect choice for outdoor lighting.

How do solar street lights work?

Our Sun-Lite solar street lights use LED lighting technology with solar panels that absorb enough energy, no matter the season. Each solar panel is made up of multiple photovoltaic cells. The energy generation process starts with these cells converting solar energy from natural sunlight into electrical energy.

How do I choose the right solar street lighting?

Choosing the right solar street lighting can dramatically reduce installation costs but requires careful consideration. Here's what to look for: Solar Panel: Check panel power (Watts), size (M²), and efficiency (%). Higher values generally mean better performance. Solar Irradiance: Know the solar power available in your location.
