

Solar Street Light Project Procurement

What is a street lighting procurement pack?

Street Lighting Procurement Pack - Model Documentation by the Local Partnerships - Model documentation aims to provide assistance to local authorities in the procurement of street lighting projects through a public private partnership or through the Private Finance Initiative. It is not intended to be a word-for-word template.

What is a solar street light project?

A solar street light project refers to the use of new technology, such as automated control systems, tubular batteries, and panel types, for generating solar electric light in roads. This project is particularly relevant in rural areas like Rajasthan, India, where transportation of electricity is less common. We are studying the implementation of solar street lights in Rajasthan to generate solar electric light on the roads.

How to choose a solar street light project?

Your solar street light project should specify the type of cover (cloud cover, tree cover, and roof cover) and any kind of obstruction present in the area that you wish to illuminate. Considering the amount of shade in your solar street light project proposal will bring shade a light on the feasibility of the project.
