

Solar street lights for taking photos at night

Do you need a streetlamp for night photography?

The streetlamp (and the window light, but that's another blog post) is the fundamental element that will help you create beautiful night images. Without the streetlamp, there is no night street photography as the streets will be pitch black and there will be no light for the camera to make a decent exposure.

What are solar powered street lights?

Easy to install just mechanical fixing no mains powered wires. Dragons Breath Solar powered street lights have been designed to adopt powered illumination using only the sun's energy. These provide us with the ability to design street lights and road lighting for uses across the UK.
