

Tax on old batteries

Are battery storage systems exempt from VAT?

Effective 1st February 2024, battery storage systems will be exempt from 20% VAT and charged 0% instead. The tax break aims to incentivise consumer uptake and support the transition to renewable energy. It applies to all battery storage deployments including retrofitted and off-grid systems.

Are battery storage projects eligible for tax relief?

Tax relief eligibility for battery storage Projects The expanded tax relief encompasses three main categories of battery storage projects, each contributing towards the enhancement of the UK's energy grid's resilience and sustainability:

- o Battery storage integrated with Solar PV: Enhancing solar energy generation with storage capabilities.

Will a VAT cut increase demand for home battery energy storage?

"The cut in VAT is exceedingly welcome and we have every expectation that it will increase demand for home battery energy storage," said Chris Hewett, chief executive of trade association Solar Energy UK. "By allowing solar power to be used after dark, it can double the savings offered by home solar power systems.

What does the new VAT policy mean for battery installations?

Extension of VAT relief for battery installations The revised policy extends the scope of VAT relief, previously limited to batteries installed alongside solar panels. It now includes provisions for standalone battery installations and the retrofitting of existing batteries, thus opening a new chapter in energy innovation.

Why is the UK slashing VAT on battery storage to 0%?

Slashing VAT on battery storage to 0% is a monumental step by the UK government to incentivise the uptake of energy storage technology and catalyse the transition to renewable energy. Here are some of the key reasons this new policy is so significant:

1. Tackles a Major Barrier to Consumer Adoption
