

## The back panel of the battery panel is burned out

Why is my car battery draining?

This can be caused by an electrical part drawing current from the battery when the car is switched off. If you're in this situation, the instrument cluster may be the problem. We'll help you figure out if the instrument cluster is draining the battery.

How do I know if my battery is drained?

Check the module for parasitic draw. Check the relay for parasitic draw. You (or a tech) can use an ammeter to check the draw from the instrument cluster. If everything looks good, then the issue may be the voltage regulator. A way to verify this is to disconnect the instrument cluster and then see if the battery is still being drained.

Is my instrument cluster draining the battery?

Is your vehicle battery suddenly draining when your vehicle is off? This can be caused by an electrical part drawing current from the battery when the car is switched off. If you're in this situation, the instrument cluster may be the problem.

Why did my s20fe back panel come loose?

My S20FE's (snapdragon) back panel came loose. Got it fixed from service centre, and they said it's due to exposure to too much heat. But even after the repair there is still a tiny gap and I can press on it and it comes together. More info in comments... I have seen this kind of post in reddit about S20 FE before.

How do I know if my car battery is bad?

Flickering lights or erratic gauges could be a sign of a weak battery. Sometimes various modules within your car (including the cluster) causing a battery drain, even when the car is turned off. The battery itself might be the problem. Easy things to check include corrosion on the battery terminals, loose terminals, or a very old battery date.

What happens if a backlight bulb is burned out?

If an indicator bulb is burned out, you may not see things like turn signals or a warning lights. If a backlight bulb is burned out, a gauge may be dark or only partially visible at night. An easy way to check your indicator lights is to turn the ignition key to the run position and monitor them as the cluster does a test cycle.

As a quick reminder (unless you've never read any of my other articles before in which case, how very dare you! ?), the solar and battery solution I have in my home consists ...
