### The battery charging station is broken

Why are my EV charging stations freezing after rebooting?

Many EV drivers have posted photos of non-working charging stations that have seemingly frozen in the middle of rebooting, including what looks suspiciously like Windows code on their screens. This is likely a host of different issues, each of which has to be addressed separately, for different stations from different makers. It's complicated.

#### Do EV chargers break?

ChargerHelp used four years of data from the 20,000 chargers it monitors, comparing networked stations' self-reported uptime against the actual uptime EV drivers find on location. EV chargers can breakin many ways, the study concludes.

#### Why do EV charging stations fail?

CONNECTIVITY: The data suggests that more than half all charging failures come from a station not being able to connect to its network for authentication. Because most EV charging networks use cellular links in their stations, they're subject to the cell-service vagaries we've all suffered. There are two fixes for this.

#### Did EV charging stop a car if it won't start?

Since November, at least three drivers who charged three different models of EV at Electrify America stations heard a loud bang, after which charging stopped and the car wouldn't start. The vehicles in question were a Ford F-150 Lightning on November 27, a Chevrolet Bolt EV on January 22, and a Rivian R1T on January 29.

#### Will a charging station blow up a non-Tesla EV?

Drivers of non-Tesla EVs sooner or later find that the locations and reliability of on-road public charging are variable at best. But the idea that a charging station might " blow up your EV" feels even more disturbing.

#### Why did a car's charging station get hacked?

Separately, that charging network told Car and Driver it " conducted a thorough investigation, and determined the isolated incident was due to an internal electrical anomaly. " Translated, that means something went wrong inside the charging station or with the power equipment feeding it.

The unfortunate reality is that currently, far too many charging stations are breaking down, leaving EV owners to drive further and further to find one that works. How many electric vehicle chargers are broken?
